

By Neco Turkienicz

If you've watched all the previous videos or read the tutorials, you'll see that I've covered all the basic functions Zoom has to offer. There are many other great tools you can use, like whiteboard, break-out groups, virtual backgrounds, webinars and more. I'll be adding specific videos and written tutorials about these functions to our tutorial page very soon, so please stay tuned.

Regarding the **40 minute limit** for group calls in the Zoom free mode, here's the workaround. If you know that your meeting is going to go over 40 minutes, let everyone know that a couple of minutes before the 40 minute mark you will end the meeting for a moment, then start it again. Tell everyone to click on the same link you sent them in the invitation to log back in. That's it, you have 40 additional minutes, and you can do this as many times as you need.

If you don't want to have this limitation and would like to have additional features, you can upgrade your account to Pro, for less than 15 dollars a month. If you're going to be using Zoom a lot, it is totally worth it.

If you find that the video or written tutorials are not enough and you need additional support, we are offering 1-1 training. Just click the link below to schedule a call with me and we can customize a program for you.
